

Explain your Thinking

★ ★ ★ ★ ★
Martian Math
 ★ How would You explain your thinking to a Martian or Alien?
 ★ Have you ever tried to figure out just what your thinking was about?
 ★ My thinking...what my thinking was about? I never really thought about that...maybe my brain is shrinking if I can't think about my thinking!
 ★ You think, and think and think and think still trying to figure out the link.
 ★ How did you solve it, what did you do to get the correct answer for Mr. Moo?
 ★ Did you count on the number line, use a grid, your fingers, draw a picture or just use a mixture?
 ★ No, I just knew it, I am sure. I did not really use any magic cure. Did you count up or back to solve that math fact?
 ★ I really don't know, but if you look you will see the correct answer I did.
 ★ Did I solve it? What did I do to get the correct answer for you?
 ★ I know...I know just what to do. I'll pretend to talk to a Martian or alien you see.
 ★ I'm an alien...are you kidding me? No you need to explain your thinking to me!
 ★ I'm not sure if you see anything a Martian doesn't know. So explain it to him and your friend!
 ★ Recognition and yes, that is your mission.
 ★ What? That seems like a lot. No you just think of all the math problems you can solve. Then figure out which one worked for you.
 ★ If you do it right you will see just how easy it can be!
