

Hide-and-Seek

Use the code to find each robot and Professor Spark. They are hiding from that prankster Polly. Write the name of the robot or person on the lines.

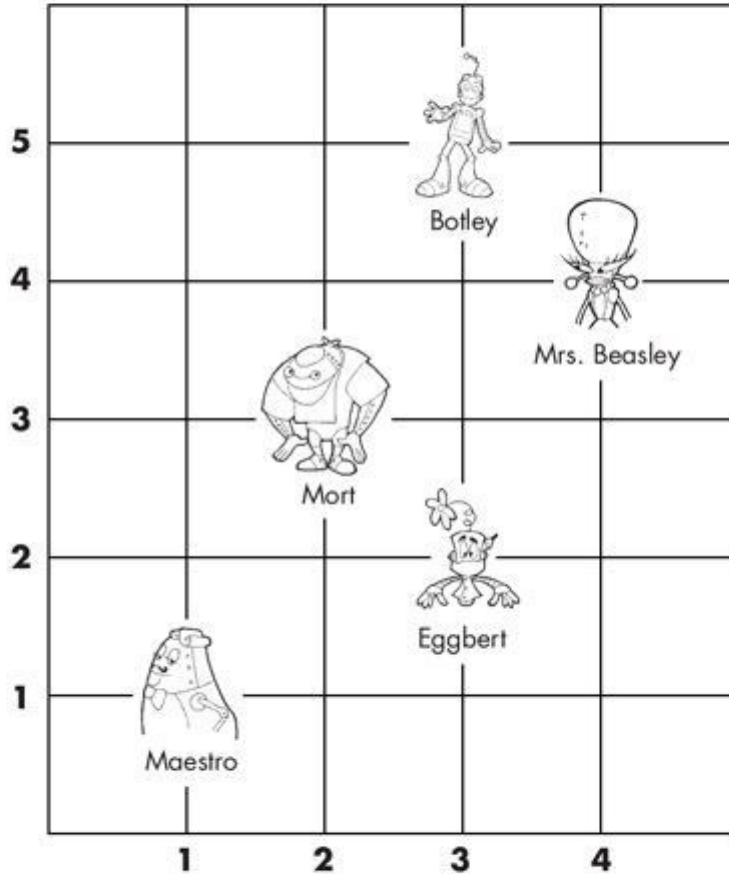

1. East 3
North 5

2. East 4
North 4

3. East 1
North 1

4. East 2
North 2

5. East 3
North 2

Botley Says:

Here's something to try. Get a piece of graph paper. It looks like a grid. Draw a picture or place a sticker at six different spots where the lines intersect. Now write directions, such as "Move East 3 and North 6." What do you find there?" Now, test members of your family as they do your east-north direction grid.
