Instructions: Answer the following word problems. Show your work.

An ear of corn has 132 kernels and 11 rows of kernels. If each row has the same number of kernels, how many kernels are in each row?

$$132 / 11 = 12$$

Together Juan and Julia completed a corn maze and walked a total of 6 miles. How far did they each walk?

$$6 / 2 = 3$$

There are 108 children waiting to go on a hay ride. If the wagon holds 9 children at a time, how many trips will the driver have to make so that each child gets a turn?

$$108 / 9 = 12$$

The tractor used for the hay ride shows that it has traveled 54 miles today. If the driver gave 9 hay rides today and did not drive the tractor anywhere else, how many miles is the hay ride?

$$54 / 9 = 6$$

There were 64 people that visited the corn maze this morning. If the maze only allowed 8 people to be in the maze at one time, how many groups of 8 were allowed into the maze?

$$64 / 8 = 8$$
