

Name _____

Skill: Learning shapes—squares

Trace and color the squares.

The main activity area is enclosed in a large black rectangular border. Inside this border, there are five dashed squares of varying sizes and orientations, intended for tracing. One square is in the top left, a larger one is in the center, and two smaller ones are at the bottom. To the right of the center square, a cartoon cat with a striped tail is peeking over a solid black square, which is intended for coloring.
