

The plant  
grows  
\_\_\_\_\_ and  
forms a  
flower.

The fully  
formed  
\_\_\_\_\_ are  
moved away  
from the  
parent plant.

The seed  
\_\_\_\_\_ to  
grow.

The pollen  
joins with an  
\_\_\_\_\_ and  
a seed starts  
to form.

Pollen from  
the \_\_\_\_\_  
lands on the  
stigma and  
travels down  
the style.
