

## AT THE DOCTOR'S

I'm a doctor. I work in a <sup>1</sup>hospital. When people are sick they call us and we go to take them in an <sup>2</sup>ambulance or they come to the hospital. <sup>3</sup>Nurses help patients, <sup>4</sup>dentists fix teeth, and <sup>5</sup>surgeons operate on people.

We often give <sup>6</sup>injections or <sup>7</sup>medicine to our <sup>8</sup>patients. If they break a leg we put it in a <sup>9</sup>plaster cast. If they hurt an ankle or have a <sup>10</sup>cut we sometimes put a <sup>11</sup>bandage or a <sup>12</sup>plaster on it.

Some people come to the hospital because they have a <sup>13</sup>headache, <sup>14</sup>toothache, <sup>15</sup>earache or <sup>16</sup>stomachache. They also come if they have <sup>16</sup>a sore throat or <sup>17</sup>a temperature.
