

HOW TO DRAW AN OAK TREE

Start with the basic shape, it is like a huge umbrella
The trunk begins as two lines that curve inward.

Draw lots of circles for the bunches of the leaves.

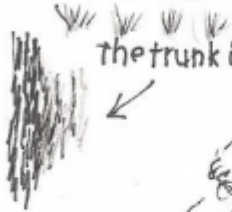

The tops of leaf clusters
are like the letter "m"

Draw the letter "n"
a few times for the
roots

To give the leaves texture draw lots of small squiggly lines.
Keep them darker at the bottom
Keep the top lighter. shade the underside.

The grass is lots of little clumps - not rows of lines.

The trunk is rough so draw lots of short choppy vertical lines.

After you draw it try using a fine tip marker to outline it and then color it in.
