

## HOW TO DRAW A WILLOW TREE

Make an outline first. Start with the trunk. Willow trees have short trunks.  
Draw a trunk with a lot of twisty curves.  
The branches reach up.

Use circles to map out the shape.

The roots are like feet that go down and out.  
The leaves hang down on ropey branches.  
Use a soft texture for the leaves in the back.  
Use a hard texture for the leaves in front.  
Make shadows underneath.

Willow trees grow by water.
