How To Draw Bubble Letters

1. Draw a "T" lightly in pencil.
2. Now draw an outline all around it.
The outline should be the same distance all the way around the letter.
3. Draw several more outlines until you get it the size you want.
4. Make sure it looks soft and bubbly with no sharp edges or corners.
5. Erase all the inside lines.
6. If you'd like your bubble letter to be even puffier, draw circles on the ends of the letter.
7. Now go over the entire outline with a black marker (Sharpies are best, 'cause they don't smear) and erase any more pencil lines. You should have a nice, round bubble letter.
8. Add extra lines inside it to indicate puffiness. Do the whole alphabet for practice.
