

Garden Measuring

Practice measuring the length of garden vegetables in inches with this activity.

Version 1- Write the Room

Place the labeled vegetables around the room. Select a recording sheet to use (letters A-M or N-Z). Search around the room for the vegetables on your recording sheet. Measure each vegetable in inches and write the answer on the worksheet.

Version 2- Vegetable Picking

Place one of each vegetable on the garden mat. Use the vegetable worksheet to record each vegetable's length in inches.
*For a fun twist, cut slits in the top of a cardboard box and place the vegetables half way inside. Students can 'pick' each vegetable from the garden!
