

Creatures in the Layers of the Ocean

Layers

The Abyss

- Small due to pressure
- No eyes
- Feed on dead matter

Layers of the Ocean

		Sharks (Speedy fish that lives in salt and fresh water)
		Squid (Jagged creatures that breathe and hunt for prey)
		Jellyfish (Soft for its prey to be hard by its glass)
		Amphipod (Live through oxygen strains)

Place them in order from top to bottom for you.

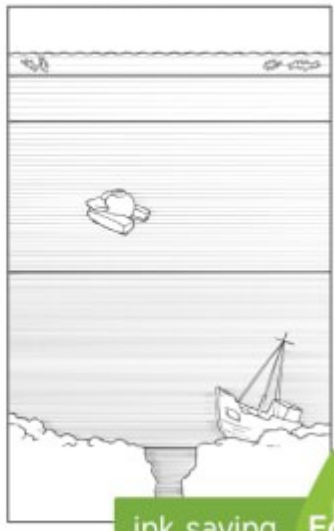

and wolf hunters
they with light

Fast fish that hunt

and hunt

- feed on dead matter
