

Math Board Games

Addition, Doubling

Doubles Bump Game

Use a die that has the numbers 2, 4, 6, 8, 10 and make your game with a number cube.

18 14 16 10 12 16 14 8 8 10

Doubling 1-1 through 1-6

8	2	10	6	2	10
10	12	6	4	6	8
2	8	4	8	12	2
4	10	12	12	4	6
12	6	8	2	8	12
6	4	2	10	6	4

Addition Bump Game

16 12 13 15 14 16 15 12 14 15 14

Addition Game

Use a die with the numbers 1-6 and add 1 to the number that is rolled.

7	6	11	8	9	7
9	8	7	6	10	11
6	10	11	9	7	9
10	7	8	9	6	8
11	9	6	10	8	10
8	11	10	7	11	6

Doubles Bump Game

Use a die or a number cube with the numbers suggested below 2 through 6 or 1 through 6.

Each player needs different color tokens (or marbles).

Use a die or a number cube with the numbers suggested below 2 through 6 or 1 through 6.

Players take turns rolling the die and placing their token on the number shown.

If the other player has a token on that space, they can be "bumped" off.

Once a player has lost all their own tokens on the board, it is their turn to keep. They can no longer be bumped off that space.

The player with the most covered spaces at the end wins the game!

12 10 4 8 12 6

Addition Game

Multi-Part Game: Doubles, Add 6, 4, 4 or 6

- Use a die with the numbers 1-6 and add 6 to the number that is rolled.
- Use a die with the numbers 1-6 and add 4 to the number that is rolled.
- Use a die with the numbers 1-6 and add 4 to the number that is rolled.
- Use a die with the numbers 1-6 and add 6 to the number that is rolled.

Addition Game

Use a die with the numbers 1-6 and add 1 to the number that is rolled.

4	5	3	6	5	3
3	8	6	7	6	4
5	4	7	4	8	5
7	3	8	8	7	6
8	6	4	5	4	8
6	7	5	3	6	7

Doubling Game

Doubling 1-1 through 1-12

14	18	20	16	18	
20	22	16	24	16	
18	14	24	14	22	18
24	20	22	22	24	16
22	16	14	18	14	22
16	24	18	20	16	24
