

All about Bees

Amazing Fact

Bees have 5 eyes; 3 simple eyes and 2 compound eyes (made up of lots of lenses).

Challenge

Match the descriptions to the bee body parts and then use the answers to label the parts of a bee in the activity sheet provided.

All about Bees

Bees collect the pollen in flowers using these. They also use them to stand.

antenna

These help the bees to smell but also help them measure how fast they are flying!

thorax

These help the bee to fly.

legs

This is the main body of the bee.

wings

These help the bee know if danger is coming from any direction.
