

## Comparing Plants and Animals

Compare plants and animals by writing or drawing in the boxes below. When completing each table, try to give examples of specific animals or plants and explain why they have a certain adaptation.

### Movement

Plants (e.g. wind, response to light)	Animals (e.g. birds, fish, snails)

### Feeding

Plants (e.g. photosynthesis)	Animals (e.g. catch, collect)

### Coverings

Plants (e.g. thorns, bark)	Animals (e.g. fur, feathers)

### Use of Senses

Plants (e.g. stimulus like Venus flytrap)	Animals (e.g. smell, touch, hearing)
