

## Subtraction - Traditional Decomposition Method (3)

Column method.

You will need to work from the units, then move onto the tens and then move onto the hundreds.

Example:  $573 - 397 =$

Write your working out like this:

	H	T	U	
	5	7	3	(3 - 7 is not possible, therefore 10 is taken from the Tens column)
-	3	9	7	(60 - 90 is not possible, therefore 100 is taken from the Hundreds column)
	1	7	6	

Complete these take away sums.

1) 
$$\begin{array}{r} 462 \\ - 197 \\ \hline \end{array}$$

2) 
$$\begin{array}{r} 735 \\ - 368 \\ \hline \end{array}$$

3) 
$$\begin{array}{r} 928 \\ - 586 \\ \hline \end{array}$$

4) 
$$\begin{array}{r} 606 \\ - 258 \\ \hline \end{array}$$

5) 
$$\begin{array}{r} 263 \\ - 194 \\ \hline \end{array}$$

6) 
$$\begin{array}{r} 643 \\ - 387 \\ \hline \end{array}$$

7) 
$$\begin{array}{r} 474 \\ - 197 \\ \hline \end{array}$$

8) 
$$\begin{array}{r} 200 \\ - 136 \\ \hline \end{array}$$

9) 
$$\begin{array}{r} 716 \\ - 539 \\ \hline \end{array}$$

10) 
$$\begin{array}{r} 700 \\ - 305 \\ \hline \end{array}$$

11) 
$$\begin{array}{r} 406 \\ - 209 \\ \hline \end{array}$$

12) 
$$\begin{array}{r} 800 \\ - 783 \\ \hline \end{array}$$
